

# **PDMotorDB**

## **License agreement**

Department of Electrical and Computer Engineering, Faculty of Science and Technology, University of Macau and Department of Neurosurgery, Beijing Tiantan Hospital, Capital Medical University make the PDMotorDB available to the scientific community. The database serves as a resource for researching novel methods and parkinson detection algorithms. Upon signing this form, the data is made available for research purposes. The requestor accepts these conditions:

- Research only : The database is solely made available for research use; data cannot be used for any commercial purpose.
- Redistribution : The database will not be distributed, full or in part, to any third party.
- Publication : Only illustrative uses of the data are permitted in scientific papers.
- Citation : Each publication on research that makes use of the database must include citations.
